

MERG related courses

If you know about any other relevant courses not listed here, in particular those in other areas, please add them.

Note that you do not have to be a MERG member to come on these courses.

These courses are organised by a group of MERG members for the benefit of other MERG members and railway modellers in general. Your booking is directly with the course organisers, not with MERG itself.

All bookings for courses that were postponed over the last couple of years will be honoured for future courses.

If you already have a booking for any course, you will be contacted directly by email about the arrangements and dates.

The dates for 2022 are now confirmed with the venues.

Missenden Railway Modellers Spring weekend - 4-6th March 2022

The Missenden March weekend 2022 has now been scheduled, and bookings are open.

See the website for more details:

More CBUS

23rd-25th April 2022

The course took place in the “Goods Shed” meeting room at the Rushden Transport Museum & Railway, Rushden Station, Northamptonshire.

See the list, at the bottom of this page, of possible courses for 2023, and if you are interested in this or another course next year, please let us know.

What this space for when the next course is scheduled.

This course is for those already familiar with the basics of CBUS, who would like to take it further.

Particular emphasis on configuring CBUS in FLiM and using the universal CANMIO firmware.

This course assumes that you have attended the Introduction to CBUS course, or that you already have a good understanding of the basics of CBUS, building modules and getting them working.

Click below for more details.

POSSIBLE COURSES FOR 2023

For 2023, we are publishing a list of our Northamptonshire courses and inviting expressions of interest. We will then run a selection of those courses for which there is most interest.

Here are the possible courses we have thought of so far, we could run up to 6 courses that generate sufficient interest:

- General kit building workshop weekend
- Introduction to CBUS development
- Programming PICs
- Programming Arduinos
- Our usual Intro and More CBUS courses
- Our usual 3 JMRI courses, Intro, signalling/logic & automation
- Introduction to DCC
- Decoder Pro
- PCB Design
- 3D printing ++
- Weathering
- Build a MERG DCC system in a weekend
- Templot

++ Subject to finding a tutor

The courses would take place at one of our venues in Northamptonshire.

If you are interested in one of the above, and would most likely come if we ran that course, please drop an email to eastmids@merg.org.uk

If you are interested in a course that is not on the above list, please also send us an email, we may well add it to the list.
